

I-5 ROSE QUARTER IMPROVEMENT PROJECT

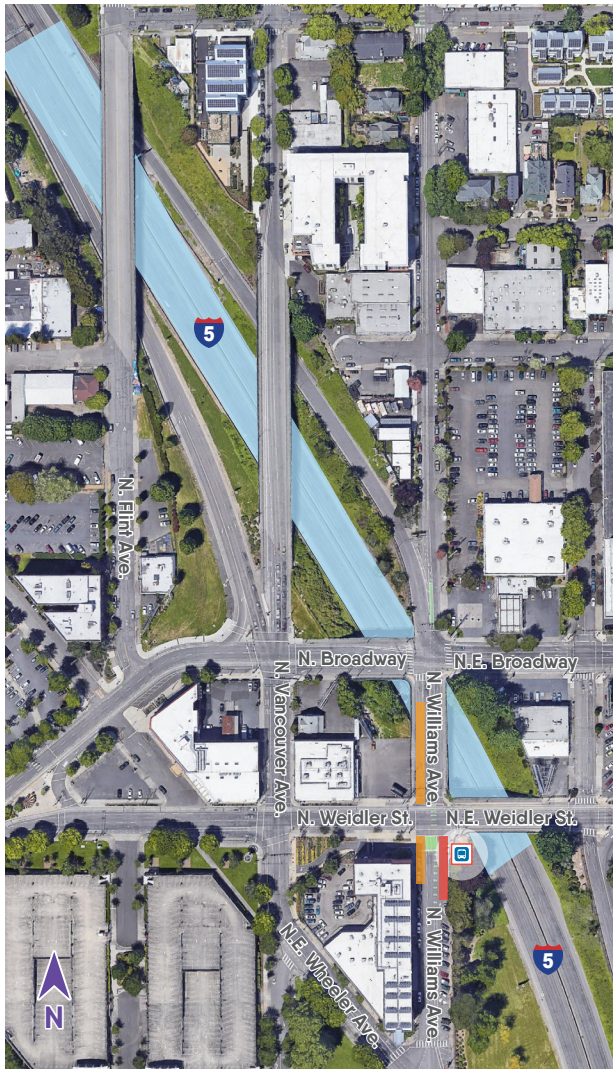

SPRING 2022

ROSE QUARTER UNDERGROUND: LOOKING AT CONDITIONS FROM THE BOTTOM UP

UPCOMING FIELDWORK IN THE AREA

Soil and material sampling

As soon as the middle of May and continuing through June, crews will continue geotechnical investigations which include soil and material sampling in the Rose Quarter project area. To sample materials, crews use a truck-mounted drill rig to collect soil and material for analysis. Holes will be filled once a sample has been collected. This work will ensure the I-5 Rose Quarter Improvement Project team develops designs that are appropriate for local soil conditions. Work will occur at the following locations:

- ▶ Along I-5 between N.E. Tillamook St. and N. Ramsay Way.
 - Some nighttime lane closures will be required to complete this work. Visit [TripCheck](#) for details on specific timing and location of these closures.
- ▶ In the leftmost turn lane of northbound N. Williams Ave. between N. Broadway and N. Ramsay Way.
 - The leftmost turn lane will be closed. Drivers turning left will need to use the middle lane.
 - Work is expected to last two days.
- ▶ In the rightmost turn lane of northbound N. Williams Ave. between N.E. Weidler St. and N. Ramsay Way.
 - The bus stop on N. Williams Ave. at N.E. Weidler St. will be closed from 8 a.m. to 3 p.m. during this work. Visit [TriMet.org](#) for details.
 - The rightmost turn lane will be closed. Drivers turning right will need to use the middle lane.
 - Work is expected to last up to four days.

You can expect:

Work dates: Middle of May through June

Daytime work: Mon-Sat, 8 a.m. to 5 p.m.

Nighttime work: Mon-Sun, 8 p.m. to 5 a.m.

Typical construction impacts such as a slight increase in noise, vibration and dust.

Soil and hazardous material sampling is weather dependent and dates may change as work approaches.

Temporary lane closures and a temporary bus stop closure will be required to complete this work. Visit [TripCheck](#) ([TripCheck.com](#)) and [TriMet](#) ([TriMet.org](#)) for specific details on timing and location.

You may hear some noise while crews work nearby, but activities will be no louder than typical traffic noises. For construction noise issues, contact Veronica Biesiada at 971-336-1632.

Visit [TripCheck](#) ([TripCheck.com](#)) and [TriMet](#) ([TriMet.org](#)) for details on specific impacts.

What is the Project?

Interstate 5 between I-84 and I-405 is the top traffic bottleneck in Oregon and the 28th worst freight bottleneck in the nation. It also has:

- ▶ Some of the highest traffic volumes in the State of Oregon with up to 12 hours of traffic congestion each day.
- ▶ A crash rate 3.5 times higher than the statewide average.
- ▶ A lack of full shoulders in key areas for crashes to clear and emergency vehicles to access.
- ▶ Nearby local streets lacking neighborhood connections and with undersized or incomplete pedestrian and bicycle facilities.

The I-5 Rose Quarter Improvement Project will add auxiliary lanes and shoulders that smooth traffic flow and improve operations to make local and regional travel more predictable and safer for people driving and transporting goods. It includes street improvements to enhance safety and access for people walking, rolling, riding transit and driving on local streets. The project will support the regional economy, future economic development and a more connected and equitable Albina community.
